Protector Build

We trade in secondhand building materials.

Founded in 1987, Uncle Casper recognized a gap in the market for reliable building materials that were cheaper, yet reliable.

SALVAGE:

Reusing building material is just a brilliant concept. It reduces the unnecessary use of new, raw materials, energy consumption and lowers the potential of greenhouse gases in processing new and fresh raw materials. And costs much less than brand new! Plus, you can sell your used building material and contribute to your building costs with that money!

The Salvage Process.

1. Should you have any excess new or secondhand building material, you can contact our offices and request for one of our Salvage Representatives to view the items you want to sell.
2. One of our Salvage Representatives will arrange a meeting to evaluate the items. Our office will then provide you with a Client Purchase Offer via E-mail / WhatsApp.

DEMOLITION:

Our demolition department offers a very unique demolition/salvage service where our salvage teams will remove all valued salvage material and a credit off-set against the demolition cost.

This service is unique in our industry and is an in-house service with no third-party involvement. This service includes the demolition of residential houses, industrial steel structures and multi-level office buildings.

Our demolition department also offers site clearing, rubble removal, tree felling, topsoil removal and first level project management.

We have various skill sets and more than 38 years of experience in our field of trade.

Other Services:

- Scrap Metal Removal
- Demolition Permits
- Asbestos Removal
- Implosion of Building

MISSION:

- “To provide a platform for home owners/ the community to buy and sell secondhand building materials, thereby promoting sustainable consumption and environmental protection.”
- “To make secondhand shopping the norm, reducing waste and supporting local economies.”
- “To offer consumers, (sometimes very unique) affordable, and sustainable secondhand goods, while fostering a sense of community and social responsibility.”

VISION:

- “To reduce waste and promote sustainable consumption by providing a platform for secondhand goods.
- “To empower and enable individuals to make environmentally conscious choices.
- “To create a culture shift towards valuing and celebrating secondhand goods,
- and promoting a much more financially sustainable economy.”
